

AEROTECH RESEARCH AND DRAFTING

Price List November 2021

All Aerotech model kits include plans of the kit model plus if necessary extra "Detail" drawings if we feel they are required. All balsa, Plywood and strip balsa has been sourced from Australian distributors and is of the highest quality.

All balsa parts are Laser-Cut at present. Our CNC machine will shortly be again "active" after a much needed up-grade.

The accuracy of the kit's is mainly due to parts that were drawn "directly" from the plan. Spar notches have been (where possible) metricated as is the balsa sizes available.

All kit prices are in Australian Dollars

Tomboy Standard 36" Wingspan

- Free Flight version (also includes ply & square stock) \$60
- Radio Control version (also includes ply & square stock) \$75

Tomboy 44" Wingspan (including larger Tailplane)

- Free Flight version (also includes ply & square stock) \$70
- Radio Control version (also includes ply & square stock) \$85

The George Aldrich "Peacemaker" is regarded as a classic control-line model. This particular rendition is the most well-known of the Aldrich Peacemaker series having a profile fuselage of 1/2" (12.5mm) thickness. This model kit has been faithfully reproduced with the only changes being made to increase its structural integrity. All the Balsawood in this kit (as the Southerner 60) is sourced from Australian distributors and is of the highest quality. Of course, the kit is Laser cut to close tolerance and quality control to provide the best enjoyment of building this time-honoured classic. **Price – \$80**

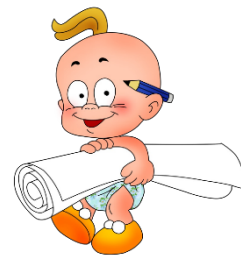

The Southerner 60 is a classic vintage Free Flight aircraft originally out of the Keil Kraft barn. This kit, produced in Australia has all the balsa and plywood parts including all stick wood. The Balsa wood quality is excellent and has been sourced from Australian suppliers as is the Plywood.

This kit is one of the feature models for the 2022 Oily Hands Gathering at Cowra along with the **George Aldrich Peacemaker**. To compliment this beautiful aircraft we have also included all required parts to convert the model to **2 Channel Radio Control**.

Price – \$180

THE KEIL KRAFT JUNIOR 60 – 63" Wingspan

The original **Junior 60** was a free flight model designed by Albert Hatful in 1946. This is the later version converted to Radio Control and has a much wider fuselage than the free flight original. With its 63" wingspan for engines of 5-7cc. Weight approx. 3-4 lbs. The **Junior 60** was an enormously popular and successful free flight model in the UK, and as such was often also used as a first R/C sport and trainer model. A classic design.

Variations in design especially in the wing centre section and generally out-dated construction methods. It was decided to re-draw the plan. The outcome was a much neater with a structurally viable wing centre.

This Laser cut kit contains all necessary balsa parts including strip wood and block-work for Cowling etc. The kit also contains all the plywood and the bearers. The kit does not contain any hardware leaving this to your own personal touch.

Price – \$170

THE SENIOR TOMBOY (RC) – 50" WINGSPAN FOR A 2.5cc MOTOR.

The senior Tomboy was designed by Ford Lloyd a well-known and respected Radio and Free Flight aero modeller who collaborated with Paul Straney also a much respected aero-modeller to design a sports model that was reliable and easy to fly, In 1993 after much discussion they decided to use the Tomboy as a reliable template for the plane they had in mind, So, the Senior Tomboy was born. The model was developed around a 2.5cc motor with a Carburettor and fitted silencer. Internally there is room for 3 servos (Rudder, Elevator and Motor control). The kit contains all balsa, strip wood, plywood and bearers but does not contain any hardware.

Price – \$170

THE MAGNUM C/L PROFILE FUSELAGE STUNT MODEL FOR 2.5cc MOTOR.

The Magnum was designed by the Late David Owens in 1976 and was chosen as the cameo model for the 2017 Cowra Oily Hands gathering. The model is very easy to build and follows current building trends. The kit contains all balsa, strip wood, plywood and bearers. There is no Hardware in the kit.

Price – aud. \$80

COMING SOON

THE SOUTHERNER "ELECTRIC" – LATE NOVEMBER

THE KEIL KRAFT LADYBIRD – LATE NOVEMBER

THE AEROFLYTE NOVA – EARLY NOVEMBER

THE GOLDBERG SHOESTRING PROFILE STUNTER - EARLY NOVEMBER

PLEASE NOTE – PRICES DO NOT INCLUDE POSTAGE
